Exam Readiness Tracker

Track your confidence per topic and your mock-exam scores over time until you are exam-ready.

How to Use the Tracker

This tracker gives you an honest, at-a-glance picture of where you stand. Rate your confidence per topic on a 1 to 5 scale, record your latest mock-exam score, and mark whether the topic still needs revisiting. Update it after each study session and each mock exam so you always know where to focus next.

Confidence	Meaning
1	New or shaky — needs a full read-through
2	Familiar but unsure — errors likely
3	Solid basics — some gaps remain
4	Comfortable — occasional slips
5	Confident — could explain it to someone else

TIP

Be honest with your ratings. Over-rating a topic hides exactly the gaps that cost marks on exam day.

Topic Confidence Tracker

Fill in your confidence (1–5), your most recent mock score on that topic, and whether it needs another pass.

Topic	Confidence (1–5)	Last score	Revisit?
Fundamentals of testing			
The seven testing principles			
Test process and activities			
Testing throughout the lifecycle			

Topic	Confidence (1–5)	Last score	Revisit?
Test levels			
Test types (functional/non-functional)			
Maintenance testing			
Static testing and reviews			
Equivalence partitioning			
Boundary value analysis			
Decision table testing			
State transition testing			
Experience-based techniques			
Test management and planning			
Risk-based testing			
Defect management			
Tool support for testing			

Mock Exam Log

Record each full mock exam. Remember the pass mark is 65% — that is 26 out of 40. Aim to consistently clear that before booking the real exam.

Date	Mock name/source	Score (/40)	Percentage	Weakest topic

Readiness Signals

You are likely ready to book the exam when the following are true:

- Every topic is rated 3 or higher, with no 1s or 2s remaining.
- You have scored 75% or more on at least two full mock exams under timed conditions.
- No topic is still marked "revisit".
- You can finish 40 questions comfortably within 60 minutes.

INSIDE STLC PRO TIP

Track scores as a trend, not a single number. Two or three mocks comfortably above 65% under real time pressure is a far better readiness signal than one lucky high score.

BEST PRACTICE

Update the tracker immediately after each study session while it is fresh. A tracker that is kept current becomes your revision plan; one updated sporadically is just decoration.
