

ISTQB FOUNDATION MASTERCLASS

Revision Planner

A weekly template to structure your ISTQB revision with prompts.

How to Use This Planner

Copy the weekly grid below into your notebook or a document and fill it in at the start of each week. The prompts turn vague "I should revise" intentions into concrete, testable goals. Revision works best in short, active sessions rather than long passive re-reading.

Weekly Planner Grid

Day	Topic / syllabus chapter	Active task	Done?
Monday		Read + summarise in your own words	
Tuesday		Make flashcards for key terms	
Wednesday		Answer 10 practice questions	
Thursday		Review yesterday's wrong answers	
Friday		Teach the topic aloud to an empty room	
Weekend	Mixed review	Short mock across the week's topics	

Start-of-Week Prompts

- Which syllabus chapter am I focusing on this week?
- Which learning objectives (K1/K2/K3) does it contain?
- What did I score worst on last week, and how will I revisit it?
- How many practice questions will I commit to this week?

End-of-Week Review Prompts

1. What are the three most important things I learned this week?
2. Which topic still feels shaky and needs another pass?
3. Did I hit my practice-question target? If not, why?

4. What one change will make next week more effective?

Active Revision Techniques

Technique	Why it works
Self-testing	Retrieval strengthens memory far more than re-reading
Spaced repetition	Revisiting over days beats cramming in one sitting
Teaching aloud	Exposes the gaps you cannot yet explain
Interleaving topics	Mixing chapters mirrors the real exam

Tracking Your Confidence

Rate each chapter red / amber / green each week. Spend most of your time on red and amber; do not over-revise the green topics you already know.

Chapter	Week 1	Week 2	Week 3
1. Fundamentals of testing			
2. Testing throughout the lifecycle			
3. Static testing			
4. Test analysis and design			
5. Managing test activities			
6. Test tools			

STUDY TIP

If you cannot explain a concept in a plain sentence without notes, you do not yet know it well enough for the exam. Use the Friday "teach aloud" task to find those gaps early.

INSIDE STLC PRO TIP

Track wrong answers, not just scores. Keep a running list of every practice question you get wrong and re-attempt them a week later. Your mistakes are the single most efficient thing you can revise.
