

QA Interview Accelerator

QA CV / Résumé Template

A clean, recruiter-ready CV structure tailored for testing roles.

Introduction

Your CV has about six seconds to make an impression. This template gives you a clear, ATS-friendly structure that puts your QA skills and results front and centre — whether you are entering testing or moving up.

Instructions

- Keep it to 1-2 pages; lead with impact, not duties.
- Mirror the language of the job description (within honesty).
- Quantify results wherever you can (defects found, coverage, time saved).
- Save and send as PDF unless asked otherwise.

Recommended Structure

Section	What to include
Header	Name, title (e.g. "QA Tester"), location, email, LinkedIn, portfolio link
Profile	2-3 lines: who you are, your focus, your strongest value
Key skills	Test design, defect management, Agile, Jira, API/Postman, SQL, automation basics, AI-assisted testing
Experience	Role, dates, and 3-5 achievement bullets each
Projects / portfolio	Course and personal QA projects with links
Education & certifications	Relevant qualifications (e.g. ISTQB if held)

Worked Example (achievement bullets)

- Designed and executed test cases for a checkout feature, identifying 12 defects before release including 2 critical payment bugs.
- Introduced a bug-report template that cut back-and-forth with developers and sped up fixes.

- Built an API test suite in Postman covering core endpoints, catching a data-integrity issue pre-launch.

Blank Reusable Template

- [Name] — [Target QA Title]
- [Location] · [Email] · [LinkedIn] · [Portfolio]
- Profile: ____
- Key skills: ____
- Experience: [Role | Company | Dates] — achievement bullets
- Projects: [Name + link + what it demonstrates]
- Education & certifications: ____

Best Practices

- Use strong verbs (designed, identified, automated, improved).
- Show outcomes, not just tasks.
- Tailor the top third to each role.

Common Mistakes

- Listing duties with no results.
- Generic CV sent to every job.
- No portfolio or project links.
- Typos — always proofread.

INSIDE STLC PRO TIP

A reviewer scans the top third first. Put your strongest, most relevant achievement where their eyes land — not buried on page two.
