

QA INTERVIEW ACCELERATOR

Module 3 Assignment — Core Software Testing Questions

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

The technical round will probe your fundamentals. You need crisp, example-backed answers to the questions QA candidates are asked most.

What you'll demonstrate

- Answer fundamentals in your own words
- Use the define-then-example structure
- Structure "how would you test X" answers

What to submit

- Answers to 10 core testing questions in your own words
- At least one example per answer

Step-by-step

1. Pick 10 core questions from the bank
2. Answer each in your own words with an example
3. For "how would you test X", use a clear structure (positive/negative/edge/non-functional)
4. Practise each out loud under 30 seconds

Submission format

Submit as a PDF or DOCX.

How your work is assessed

If a QA lead reviewed this, they would look for:

- Crisp definitions in your own words
- An example with each answer
- Structured "how would you test X" answers
- No confusion of severity/priority or regression/retest

Templates & resources to use

- QA Interview Question Bank — find it in the Resource Vault.
- Defect Severity vs Priority Guide — find it in the Resource Vault.

INSIDE STLC PRO TIP

For any "difference between" question, define both terms in one line each, then give a quick example — it instantly sounds confident and clear.
