

90-DAY SOFTWARE TESTING CAREER ROADMAP

Module 10 Assignment — Portfolio Building

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

You are ready to prove you can do the job. Assemble the work from across this course into a professional, public QA portfolio an employer can explore.

What you'll demonstrate

- Curate strong QA artefacts
- Structure and document them clearly
- Explain what each demonstrates

What to submit

- A public portfolio (repo, site or document)
- A test case pack, a bug report, an API collection, an SQL example, an AI workflow, and an about/intro section

Step-by-step

1. Gather your best artefacts from each module
2. Add a 2-3 line context note to each ("what this demonstrates")
3. Organise into a clear structure with a README/intro
4. Publish it and link your CV/LinkedIn

Submission format

Submit a PDF summary with links to your published portfolio.

How your work is assessed

If a QA lead reviewed this, they would look for:

- A clear introduction and structure
- Curated, well-explained artefacts
- Everything public and links working
- Quality over quantity

Templates & resources to use

- Final Portfolio Project Workbook — find it in the Resource Vault.

INSIDE STLC PRO TIP

Six strong, well-explained pieces beat twenty unexplained ones. Curate ruthlessly and be ready to talk through each in 60 seconds.
