

QA INTERVIEW ACCELERATOR

LinkedIn Profile Optimisation Guide for Testers

Turn your LinkedIn into a magnet for QA recruiters.

Introduction

Recruiters search LinkedIn constantly for testing talent. An optimised profile gets you found and makes a strong first impression. This guide walks you through every section.

Instructions

- Work through each section below and update it.
- Use keywords recruiters search for (QA, test, automation, Agile).
- Keep it consistent with your CV.

Section-by-Section

Section	Make it count
Photo	Friendly, professional headshot
Headline	Role + value + keywords, e.g. "QA Tester Manual & Automation Agile API Testing"
About	3-4 short paragraphs: who you are, skills, what you are looking for, a call to connect
Experience	Achievements with metrics, mirroring your CV
Skills	Add and pin the QA skills recruiters filter by
Featured	Pin your portfolio, certificate or a strong post
Open to work	Turn on (recruiter-only if discreet)

Worked Example (headline + about opener)

Headline: "Software Tester | Manual + Automation | Agile · Jira · API · SQL | Building a QA portfolio". About opener: "I am a detail-driven tester focused on preventing defects early and communicating quality clearly..."

Practical Exercise

Rewrite your headline and the first two lines of your About section using the formula above. Add five QA skills and pin your portfolio to Featured.

Best Practices

- Write in the first person — it reads warmer.
- Post or comment occasionally to stay visible.
- Keep keywords natural, not stuffed.

Common Mistakes

- Blank or one-line About section.
- No keywords, so you never appear in searches.
- Profile that contradicts the CV.

INSIDE STLC PRO TIP

Recruiters search by keyword. If "automation", "API" or "Agile" appear naturally in your headline and About, you turn up in far more searches.
