

AI FOR QA TESTERS

Module 1 Assignment — The AI Shift in QA

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

Your team is starting to use AI and your lead wants to see you have a balanced, realistic view — where AI genuinely helps testers and where human judgement must stay in control.

What you'll demonstrate

- Explain where AI helps in QA
- Identify decisions that must stay human
- Set realistic expectations of AI

What to submit

- A one-page reflection on AI in QA
- Five testing tasks AI can assist with and three decisions that must stay with a human, each with a reason

Step-by-step

1. List routine testing tasks AI could speed up
2. List quality/risk decisions that must stay human
3. Give a short reason for each
4. Conclude with your one-line position on AI in QA

Submission format

Submit as a PDF or DOCX, around one page.

How your work is assessed

If a QA lead reviewed this, they would look for:

- A balanced, realistic view of AI
- Clear examples of where it helps
- Awareness of limits and the tester's accountability

Templates & resources to use

- AI Usage Policy Template — find it in the Resource Vault.
- AI-Assisted QA Workflow Poster — find it in the Resource Vault.

INSIDE STLC PRO TIP

Frame AI as a productivity multiplier, not a replacement — that balanced view is exactly what employers want to hear.
