

## AI FOR QA TESTERS

# Module 11 Assignment — AI Risks, Ethics and Governance

---

Assignment brief: scenario, deliverables, steps and how your work is assessed.

---

## About this assignment

---

Your team needs to use AI responsibly. You will demonstrate the data, bias, accountability and transparency thinking expected of a professional.

## What you'll demonstrate

---

- Apply data-handling rules
- Recognise bias and reliability risks
- State review controls and accountability

## What to submit

---

- Your personal responsible-AI statement (data, verification, accountability)
- The AI Risk Assessment Checklist applied to a real task, with any failing item reworked to pass
- One unsafe prompt reworked into a safe one

## Step-by-step

---

1. Write your four-point governance statement
2. Apply the risk checklist to a real task
3. Rework anything that fails
4. Show an unsafe→safe prompt example

## Submission format

---

Submit as a PDF or DOCX.

## How your work is assessed

---

If a QA lead reviewed this, they would look for:

- Clear data-handling rules
- Awareness of bias and hallucination
- Explicit review/accountability
- Concrete safe/unsafe examples

## Templates & resources to use

---

- AI Ethics & Governance Guide for QA — find it in the Resource Vault.
- AI Risk Assessment Checklist — find it in the Resource Vault.

### **INSIDE STLC PRO TIP**

A simple test before sending any prompt: "would I be comfortable if this were public?" If not, do not send it.
