

AI FOR QA TESTERS

Module 12 Assignment — Building Your AI QA Workflow

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

This is your capstone: assemble a complete, repeatable, responsible AI QA workflow and toolkit you could actually use on the job.

What you'll demonstrate

- Design a repeatable AI-assisted workflow
- Build a personal toolkit
- Show responsible use and judgement

What to submit

- Your AI QA Pack: a workflow across the sprint, a toolkit (5 saved prompts + tool-per-task + rules), one worked example (prompt → output → your review), and your governance statement

Step-by-step

1. Map where AI helps at each sprint stage and what you verify
2. Capture your saved prompts, tools and rules
3. Include one worked example with your review notes
4. Add your governance statement

Submission format

Submit as a PDF or DOCX — your complete AI QA Pack.

How your work is assessed

If a QA lead reviewed this, they would look for:

- A repeatable, sensible workflow
- A real toolkit with safe rules
- A worked example showing review/judgement
- Clear governance

Templates & resources to use

- Personal AI Toolkit Planner — find it in the Resource Vault.
- AI-Assisted QA Workflow Poster — find it in the Resource Vault.

INSIDE STLC PRO TIP

Your prompt library is a career asset — a tester who arrives with a proven AI toolkit ramps up far faster than one starting from zero.
