

AI FOR QA TESTERS

Module 6 Assignment — Exploratory Testing with AI

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

You have a feature and a time-box. You will use AI to generate charters and personas, then do the actual exploring and capture what you find.

What you'll demonstrate

- Generate charters and personas with AI
- Explore against the real product
- Let findings drive new charters

What to submit

- 10 AI-generated charters for a feature
- Notes from two short sessions
- Three follow-up charters your findings revealed

Step-by-step

1. Prompt AI for charters and personas
2. Run two time-boxed sessions, taking notes
3. Log findings and surprises
4. Create follow-up charters from what you found

Submission format

Submit as a PDF or DOCX.

How your work is assessed

If a QA lead reviewed this, they would look for:

- Charters used as a start, then real exploration
- Clear session notes and findings
- Follow-up charters from surprises
- Security/usability/edge angles covered

Templates & resources to use

- AI Exploratory Testing Workbook — find it in the Resource Vault.

INSIDE STLC PRO TIP

AI gives you more doors to try; exploratory skill is knowing which to open and what you notice once inside.
