

QA INTERVIEW ACCELERATOR

Interview Day Checklist

Everything to prepare before, during and after the interview.

Introduction

Preparation turns nerves into confidence. This checklist makes sure nothing is left to chance on interview day, whether it is in person or remote.

The Day Before

- Re-read the job description and your CV
- Review your STAR stories and elevator pitch
- Research the company and prepare 2-3 questions to ask
- Test your tech (camera, mic, link) if remote
- Lay out clothes / check the route

Just Before

- Quiet, tidy, well-lit space (remote) or arrive 10 mins early (in person)
- Water, notepad, copy of CV and portfolio link to hand
- Phone on silent; close distracting apps

During

- Smile, breathe, and take a moment before answering
- Use STAR for behavioural questions
- Ask to clarify if a question is unclear
- Show enthusiasm and ask your prepared questions

After

- Send a short thank-you / follow-up email
- Note questions asked and how you answered
- Capture anything to improve for next time

Common Mistakes

- No questions prepared for them.
- Untested tech causing a stressful start.
- No follow-up afterwards.

INSIDE STLC PRO TIP

Always prepare two thoughtful questions to ask them. Candidates who ask good questions seem genuinely interested — and it is often what interviewers remember.
