

90-DAY SOFTWARE TESTING CAREER ROADMAP

Test Case Template

A professional, reusable format for writing clear, runnable test cases.

Introduction

A test case describes exactly how to verify one behaviour, so anyone can run it and get the same result. Well-written test cases are repeatable, specific, and independent. This template gives you a consistent structure you can reuse for every feature.

Instructions

- Give each test case a unique ID and a clear, descriptive title.
- State the preconditions and the exact test data needed.
- Write numbered, unambiguous steps — no assumed knowledge.
- Define a specific, verifiable expected result.
- Keep each test case independent of others and focused on one behaviour.

Real QA Example

Field	Example
Test Case ID	TC-LOGIN-002
Title	Login fails with an incorrect password
Preconditions	A registered, active user account exists
Test Data	Email: valid@example.com · Password: WrongPass1
Steps	1. Go to /login 2. Enter the valid email 3. Enter the wrong password 4. Click Log in
Expected Result	Error "Incorrect email or password" is shown; the user remains logged out
Priority	High
Status	Pass / Fail

Blank Reusable Template

Field	Detail
Test Case ID	
Title	
Module / Feature	
Preconditions	
Test Data	
Steps	1. 2. 3.
Expected Result	
Priority	High / Medium / Low
Actual Result	
Status	Pass / Fail
Notes	

Best Practice Tips

- Use test-design techniques (equivalence partitioning, boundary value analysis) to choose strong inputs.
- Write the expected result as something observable and specific.
- One test case = one behaviour. Split anything that checks several things.
- Include negative and boundary cases, not just the happy path.

Common Mistakes

- Vague expected results such as "it works".
- Steps that assume knowledge ("log in as usual").
- One giant test case verifying ten unrelated things.
- Test cases that depend on a previous test having run first.

INSIDE STLC PRO TIP

Your test cases are portfolio gold. A small set of clear, professional test cases shared in an interview proves your skill better than any certificate.
