

QA INTERVIEW ACCELERATOR

Module 5 Assignment — Scenario-Based QA Questions

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

Interviewers use scenarios ("a critical bug reaches production...") to test how you think. You need a calm, structured approach and honest, mature examples.

What you'll demonstrate

- Structure scenario answers
- Own mistakes with a learning mindset
- Prioritise by risk and communicate clearly

What to submit

- STAR answers for four scenario/behavioural questions (a defect you are proud of, a conflict, working under pressure, a mistake you learned from)

Step-by-step

1. Pick four scenario/behavioural questions
2. Draft a STAR answer for each
3. End each on a constructive outcome or lesson
4. Practise out loud, staying calm and concise

Submission format

Submit as a PDF or DOCX.

How your work is assessed

If a QA lead reviewed this, they would look for:

- Calm, structured reasoning
- Honest ownership of mistakes
- Risk-based prioritisation and clear communication

Templates & resources to use

- Behavioural Interview Prep Workbook — find it in the Resource Vault.
- QA Interview Question Bank — find it in the Resource Vault.

INSIDE STLC PRO TIP

Never claim you have never missed a bug — own a real example and what you changed; that maturity is exactly what interviewers want.
