

PRACTICAL TEST AUTOMATION WITH PLAYWRIGHT

Module 4 Assignment — Playwright Essentials

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

Time to write real Playwright tests. You will build your first suite using robust locators and web-first assertions — no fixed waits.

What you'll demonstrate

- Use robust, user-facing locators
- Use web-first assertions
- Run and debug tests

What to submit

- A Playwright suite of at least five tests
- A screenshot of a passing run and your config

Step-by-step

1. Set up the project and pick a target app
2. Write five tests using getByRole/getByLabel and web-first assertions
3. Avoid waitForTimeout entirely
4. Run the suite and capture a passing report

Submission format

Submit as a PDF/DOCX or a repository link.

How your work is assessed

If a QA lead reviewed this, they would look for:

- Robust, user-facing locators
- Web-first assertions, no fixed waits
- One behaviour per test
- A clean passing run

Templates & resources to use

- Playwright Locator Strategy Cheat Sheet — find it in the Resource Vault.
- Playwright Assertions Cheat Sheet — find it in the Resource Vault.

INSIDE STLC PRO TIP

Locate elements the way a user describes them — "the Sign in button" → `getByRole('button', { name: 'Sign in' })`. It is the single biggest factor in stable tests.
