

AI FOR QA TESTERS

Module 7 Assignment — Defect Reporting and Root Cause Support

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

You found a defect and want AI to help you write it up clearly and reason about the cause — while you stay accountable for every technical fact.

What you'll demonstrate

- Use AI to sharpen a bug report
- Reason about root cause with AI
- Verify all technical detail

What to submit

- A bug report you wrote, plus the AI-improved version
- Three wording improvements you accepted and one suggestion you rejected because it was wrong

Step-by-step

1. Write a bug report yourself with the real facts
2. Ask AI to review it for clarity, structure and completeness (sanitised)
3. Apply genuine improvements; verify every technical detail
4. Note one suggestion you rejected and why

Submission format

Submit as a PDF or DOCX, before and after.

How your work is assessed

If a QA lead reviewed this, they would look for:

- Clearer reports with verified facts
- AI used for wording, not invented facts
- Data sanitised before pasting
- Severity/priority owned by you

Templates & resources to use

- AI Bug Report Review Guide — find it in the Resource Vault.

INSIDE STLC PRO TIP

Let AI improve the words; you own the facts. The developer acts on your facts — so verify them.
