

QA LEADERSHIP ACADEMY

Module 12 Assignment — Building the QA Transformation Roadmap

Assignment brief: scenario, deliverables, steps and how your work is assessed.

About this assignment

This is your capstone. Over the programme you have assessed Northstar's current state and maturity, built team capability and hiring plans, set a QA strategy, made a release risk call, designed a metrics framework, and shaped automation, AI, stakeholder and people plans. Now Priya and the CTO want it as one coherent leadership portfolio: a single narrative that shows where Northstar is, where it is going, and how you will get it there over the next twelve months.

What you'll demonstrate

- Synthesise every earlier artefact into one coherent transformation story
- Sequence change realistically against Northstar's cost and delivery constraints
- Present a portfolio that stands up to executive scrutiny
- Demonstrate end-to-end QA leadership, not a collection of documents

What to submit

- A QA Leadership Transformation Portfolio assembling all fifteen parts
- The fifteen components: executive summary, current-state assessment, maturity assessment, quality risk profile, QA strategy, team capability assessment, skills matrix, hiring/capability recommendations, automation strategy, AI adoption strategy, metrics framework, stakeholder communication plan, 30/60/90-day plan, 12-month roadmap and executive presentation
- An executive presentation that tells the story in minutes

Step-by-step

1. Gather and refine the artefacts you produced in Modules 1-11 so they speak to one another
2. Write the executive summary last but place it first — the one page a busy CTO reads
3. Assemble the fifteen parts in a logical order, resolving any contradictions between earlier pieces

4. Build the 30/60/90-day plan and the 12-month roadmap so sequencing respects Northstar's cost discipline and delivery cadence
5. Produce the executive presentation that carries the whole story for Priya and the CTO

Submission format

Submit as a PDF or DOCX portfolio, with the executive presentation included or attached.

How your work is assessed

If a QA lead reviewed this, they would look for:

- A coherent narrative, not fifteen stapled-together documents
- Earlier artefacts refined and reconciled rather than dumped in
- Sequencing that is realistic about cost, headcount scrutiny and delivery pressure
- An executive summary and presentation that land the story fast
- Evidence of genuine end-to-end QA leadership across people, process, technology and stakeholders

Templates & resources to use

- QA Strategy Template — find it in the Resource Vault.
- QA Current-State Assessment Template — find it in the Resource Vault.

INSIDE STLC PRO TIP

This portfolio draws on every artefact you have built across the programme — treat it as one argument, not an anthology. The executive summary is the part most people will read, so make it the sharpest page you write.
